Meta Tag Manager

Settings saved.

Custom Meta Tags | General Options

Use the meta tag builder to create meta tags which will be used on your site. You can choose what kind of meta tag to display, as well as where to display them such as on all your pages, just the home page or specific post types and taxonomies. You can also enter a reference name at the top of each field card (something to help you remember the meta tag) and then enter the values below it that you want the meta tag to hold. For adding meta tags to specific post types, please click on the 'General Options' tab above.

Google verification All Pages

`<meta name="..." content="<meta name="google-site-verification" content="3fbnbkCRGTv85g3vmkguF0BmxU6XbkdoXB2m2t0PTI" />" />`

Verify your ownership of https://winningbets-aus.com/. [Learn more](#).

Your Google Account will be recorded in Google's systems as an official owner of this property. Note - your ownership information will be stored and be visible to other owners (both current and future).

Verification | History

Verification Method: HTML tag

Add a meta tag to your site's home page.

1. Copy the meta tag below, and paste it into your site's home page. It should go in the <head> section, before the first <body> section.

```
<meta name="google-site-verification" content="3fbnbkCRGTv85g3vmkguF0BmxU6XbkdoXB2m2t0PTI" />
```

[Show me an example](#)

2. Click **Verify** below.

To stay verified, don't remove the meta tag, even after verification succeeds.
